## **AMERINET INKS DEAL WITH RADON MEDICAL**

CHARLESTON, WV, SEPTEMBER 1, 2007: In late July 2007 Radon and Amerinet completed a GPA (Group Purchasing Agreement) for Radon Medical Imaging Corp. - WV to be a supplier of market leader Barco (Barco, Inc., Duluth, GA.) displays to Amerinet GPO members for a 3 year period, beginning Sept. 1, 2007. Barco displays are widely recognized as providing diagnostic confidence, high quality and exceptional value to medical imaging professionals. Radon will be an active participant in the Medical Informatics regional meetings.

**About Radon Medical Imaging Corp-WV:** Radon has been a Value Added Reseller for Barco display products for a number of years. Radon's expertise in the area of digital imaging products and support contributes to Radon's ability to not only distribute Barco products, but advise the customer as to model and feature selection warranted for the particular application.

**About Amerinet:** Amerinet has taken the approach of offering a specific line of products to its informatics group offerings. With the complexity of the medical imaging and IT products available, Amerinet has developed a focused marketing and support group for these products. The informatics group holds regional meetings to offer assistance and educational opportunities to its membership to help the facilities make educated decisions as to the very best in products and vendors to support those selections.

**About BARCO:** Barco Displays are clearly the market leader in diagnostic quality flat panel displays. Barco displays offer system wide integration to Barco's web based display QA program and have auto calibration functions built into each display. With unmatched image quality, Barco displays are the most widely used PACS displays in North America.
